Spring Term 2017

8 Jan  Euan Nisbet (Royal Holloway)
Methane and the Paris Agreement

15 Jan  Chen Wei (IAP, Chinese Academy of Sciences)
Anthropogenic influence on recent change in temperature extremes over China

22 Jan  Aidan Brocklehurst (AON Benfield Impact Forecasting)
A probabilistic catastrophe model for wind storms in Europe

29 Jan  Heather Graven (Imperial College)
Radiocarbon as a carbon cycle tracer in the 21st century

5 Feb   Stephen Thomson (University of Exeter)
Atmospheric responses to SST anomalies: background-state dependence, teleconnections, and local effects

12 Feb  Wendy Parker (Durham University)
Let’s not confirm (or falsify) our models

19 Feb  Ed Hawkins, Stephen Burt (University of Reading)
Operation Weather Rescue: to Ben Nevis and beyond

26 Feb  Michelle Cain (University of Oxford)
Climate metrics under ambitious mitigation

5 Mar   Yoko Tsushima (Met Office)
Use of a Perturbed Parameter Ensemble to Understand Model Errors in Clouds and their Impact on Cloud Feedbacks

12 Mar  Jordi Vila (Wageningen University)
Evapotranspiration and cloud variability at regional sub-grid scales

19 Mar  Thomas Birner (Colorado State University)
The changing width of Earth’s tropical belt
