

Oklahoma!

"Oklahoma, where the wind comes sweepin' down the plain

Where the MMet clique, we like to teach

Warm sector comes right behind the rain.

Oklahoma, Ev'ry night my honey Ross and I

Watch for twisters forming when CAPE's high

Makin' crazy circles in the sky."

Over the Rainbow

Somewhere over the tropopause
Where it's dry
There's a place called the stratosphere
Where PV's very high

Somewhere over the tropopause
We can show
Sudden stratospheric warmings
Can bring us lots of snow

We will create lots of hot air
To rise extremely fast up there
Above us
And it will still be warm you see
No cooling adiabatically
Wob's plan is genius

Somewhere over the tropopause
Way up high
We will combat global warming
No polar bears will die

We will create lots of hot air
To rise extremely fast up there
Above us
And it will still be warm you see
No cooling adiabatically
Wob's plan is genius

In this plan our kids future lies
Beyond the tropopause
It will all be fine

Eye of the Tiger

Hiding out, scared out my wits
Couldn't focus my beam right
My z's so low, how's it d to the six?
Couldn't harness the courage to fight

It's the courage inside me
That I struggled to find
But I rose to the challenge of my rival
And now I'm, a survivor
I will always be brave
Now I know I've got courage within
Like a lion

All alone, out in the cold
Misery was no ending
Wouldn't help you, I had no heart of gold
MMP simply won't run itself

It's the heart of the tin man
That I struggled to find
All I knew was the sad face of a stranger
And now I, have my friends here
I acknowledge my heart
And I know it was always inside
Of the tin man

Straw for brains, don't understand
Couldn't model a straight line
The only wave I knew it was with my hand
In my mind, there was only white noise

It's the brain of the scarecrow
That I struggled to find
All I knew was the blue sky and the sunshine
And now I, am triumphant
I know I have a brain
And I know it was always inside
Of the scarecrow

It's the heart, brain and courage
That we struggled to find
It just took this adventure to uncover
So that now and forever
We have the qualities
And we know they were always inside
Each one of us

Shine

You, you're such a big star to me
You're everything I wanna be
We got stranded in Oz, and you helped us to get out
We used the heart of Rosemarie
The courage of Anthony
And John's brain came along
And we figured it out out out
Solid precipitation cooled us down
When it should've been warm, it should have been warm, warm warm

So come on, BBQ, get it on
This was what you're waiting for
The sun is coming, somewhat late! Hey Hey!
So come on
Feel the warmth, on your face
The sun shine
It's the sun shine
Let it shine

Wob, was a very nasty man
Wanted to foil Keith's plan
Said he'd stop climate change
So talked the mothers around
Rosemarie opened their eyes
They saw through his disguise
So it all worked out and they wanted to smile smile smile
Now that the stratosphere has cooled back down
Summer is now warm, summer is now warm, warm, warm

So come on, BBQ, get it on
This was what you're waiting for
Summer is coming, he was right! Hey Hey!
(Keith only) So come on
(Keith only) FRS, in your face!
(Keith only) Cos I'm shine
(Keith only) The great Keith Shine
(Keith only) I'm Keith Shine

So come on, BBQ, get it on
This was what you're waiting for
The sun is coming, somewhat late! Hey Hey!
So come on
Feel the warmth, on your face
The sun shine
It's the sun shine
Let it shine
