

"Chemtrail Wizard"

Ever since I was a postdoc,
I've argued with them all.
The climate change deniers
They hit me with snowballs.
With total lack of evidence
You're sure to hear them wail...

"That climate professor
Sure makes a mean chemtrail!"

Now they like to tell me
HAARP's "secrets" are revealed
"A cascade of electrons
Flips Earth's magnetic field"
Conjured up conspiracies
To send me off to jail.

"That climate professor
Sure makes a mean chemtrail!"

I'm no chemtrail wizard
My arguments fall flat
No Chemtrail wizards so lose your tin foil hats

Why do they think this makes sense?
I don't know!
What makes them so thick?

They hacked in to my emails
Now that's the final straw,
I'm quitting climate science
Can't take this any more
Not one sign of foul play
They still spin their tale.

"That climate professor
Sure makes a mean chemtrail!"

They think I am a governmental front
But now I'm going to strike off on my own

I'm switching to biology
Working on the brain.
And dispersion of pollutants
releasing from a plane.
My mind control concoction,
I'll make them inhale.

This climate professor
Sure makes a mean chemtrail!
