# Make a Times Tables Quiz on Scratch

To find links to everything we have done so far go to
`www.met.reading.ac.uk/~sws02hs/teaching/codeclub/`
This week we will be writing a times tables quiz. There is a video to watch:
`youtube` and some Scratch code to start from:

Challenges

1. If you get it wrong, make Scratch tell you the right answer rather than just saying "Wrong".

2. Make it ask for the times tables between 2 and 12, not between 1 and 12.

3. If you get one wrong, make it ask that one again at the end.

4. Make it ask for the times tables in a random order.
