Using cf-python and cf-plot

On jasmin1 - jasmin6

setup anaconda

On the Met cluster:

```
export PATH=/opt/tools/ncas/anaconda2/bin:$PATH
```

On jasmin@ceda

```
python2.7
```

Archer

```
module load anaconda/2.2.0-python2 cf
```

```
module swap PrgEnv-cray PrgEnv-intel
```

On a Linux laptop:

Download and install Anaconda Python 2.7 for Linux. On the command line type:

```
conda install -c ncas -c scitools cf-python cf-plot
```

```
conda install -c conda-forge -c nesii netcdf-fortran=4.4.4 mpich  
esmpy
```
